

World TKd Championships South Korea 2

Carlos Martin: The world Junior tournament began on 15th. Let us remember that the Spanish team participates in senior world champs, for that reason we have enough time to program each training session, and watch the juniors event.

The Juniors started with great enthusiasm; some with more experience that clearly was taken advantage of the opponents with minus experience. I would like to highlight the intense work by referees and organizers into the five competition areas.

The Spanish team preparation continues in a good road. The morning training session used for patterns makes me feel sure that we should win the tournament. Italy will be our first objective in mind for the first round.

In the afternoon we had session of sparring. A very intense session with great atmosphere. Our particular dojang alternate between our hotel parking and another near parking.

I want to highlight that the team brings its own physiotherapist, Mr. Abdel Monaim Abrighach of the Policlinica Sanimar of Fuengirola, he is making an incessant work with the boys to have them ready for the championship.

I have very good feelings with the team.....
